

**Join the Middle East Aquaculture Forum 2016, to be held in conjunction with Future Fish Eurasia at Fair Izmir Expo Center in Izmir, Turkey, 2-4 June 2016.**

Created in 2015, the Middle East Aquaculture Forum (MEAF), saw its first edition in Dubai. MEAF brings together aquaculture industry experts and academics from the Middle East, to showcase the latest products and offer industry professionals a state-of-the-art platform to interact. The MEAF programme includes specific topical industry sessions, technical sessions, facilitated workshops and panel discussions and provides a unique networking platform to industry professionals and aquaculture academics.

Rotating around the Middle East countries on a yearly basis to meet the need for education, networking and business exchange, MEAF16 will partner with the Future Fish Eurasia 2016 exhibition.

MEAF16 invites all aquaculture suppliers, farmers, investors, and other aquaculture experts to submit their presentations on recent results, projects and research, while inviting academics to share their findings on specific regional issues.

Some of the topics of MEAF are: shrimp, biotics & bioflocs, marine fish, aquaponics, aquaculture investment in the Middle East & Central Asia, sustainable aquaculture, freshwater fish, nutrition, health, algae, seaweeds, production systems, offshore aquaculture & IMTA, water conservation, education & technology transfer,...

Dr. Ozgur Altan – aquaculture expert working for the Sub-regional Office for Central Asia – will be chairing the programme and representatives from the Industry will set-up a dedicated Industry Committee to tackle specific industry topics.

More info on MEAF can be found online: **[www.meaf.ae](http://www.meaf.ae)**.
